SUMMARY

Full Stack Software Engineer with 3+ years of experience building web applications using TypeScript, React, Node.js, and PostgreSQL. Experienced in owning features end-to-end, from reusable UI components and API design to database architecture and deployment. Delivered production systems that generated a significant 300% increase in client's revenue.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL
Frontend: Next.js, React, Redux, Tailwind CSS, Axios, Motion
Backend: Express, Node.js, Prisma ORM, PostgreSQL, MongoDB, MySQL
Tools: REST APIs, Authentication, Vite, Git, CI/CD Pipelines, Stripe, Heroku, Figma

EXPERIENCE

Ascent Studio
Founder, Full Stack Software Engineer

Jun. 2025 – Present
Modesto, CA

- Architected and shipped a production-grade multi-tenant field service platform replacing a \$300/month SaaS tool, supporting scheduling, dispatch, CRM, invoicing, payments, and customer workflows end-to-end.
- Implemented secure authentication and authorization using JWT and role-based access control, supporting multiple user tiers and protected application workflows.
- Integrated Stripe billing and payment infrastructure to enable secure customer payments and connect transaction workflows across the platform.

Duct Daddy
Full Stack Software Engineer | Contract

Sep. 2024 – May 2025
Remote

- Drove a 300% revenue increase within 6 months by designing and shipping a custom CMS and service booking platform for a growing home services business.
- Architected reusable CMS workflows for dynamic marketing pages, blog publishing, and operational updates, enabling non-technical staff to manage site content independently.
- Built service intake and booking workflows with Next.js, Node.js, and MongoDB, integrating Twilio and SendGrid for transactional SMS and email confirmations, reminders, job status, and customer updates.

Bay Valley Tech
Frontend Software Engineer Intern

Mar. 2024 – Sep. 2024
Modesto, CA

- Improved cross-device usability of a full-stack social platform by developing responsive UI components and navigation systems across desktop and mobile.
- Delivered production features within an Agile/Scrum development process, participating in code reviews, daily standups, sprint work, and technical presentations to organizational leadership.
- Integrated a React frontend with RESTful APIs using Axios, enabling authentication, client-side routing, and dynamic data rendering across core platform workflows.

PROJECTS

Chat App

React, Node.js, Express, MongoDB, Socket.IO, JWT, Cloudinary

- Enabled real-time communication by architecting persistent 1-on-1 messaging with Socket.IO, allowing users to exchange messages instantly without page refreshes.
- Improved user engagement and continuity by combining persistent conversation history, authenticated user accounts, contacts, and media sharing into a unified messaging experience.
- Strengthened application security and reliability by implementing JWT-based authentication, protected API routes, password hashing, and structured frontend/backend separation across the application.
