SUMMARY

Full Stack Software Engineer with 4+ years of experience building scalable and accessible web applications using React and TypeScript. Skilled in component-based architecture, reusable UI development, and RESTful API integration. Proven ability to collaborate with product, design, and backend teams to deliver intuitive, production-grade user experiences.

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL

Frontend: React, Next.js, Redux, Tailwind CSS, Axios, React Router, Motion

Backend: Express, Node.js, MySQL, Prisma ORM, MongoDB, PostgreSQL, RESTful APIs,

Tools: Git, GitHub, Postman, Figma, Agile / Scrum, CI/CD

EXPERIENCE

Liftmark

June 2025 – Present

Senior Software Engineer

Modesto, CA

- Engineered a full-stack field service management platform using Next.js, Node.js, Express, PostgreSQL, and Prisma ORM, supporting booking, scheduling, dispatching, payments, invoicing, and CRM functionality
- Implemented real-time operational workflows using polling-based data synchronization to coordinate technicians, jobs, and customer updates
- Replaced multiple third-party tools with a unified platform, reducing operational complexity and saving \$5K annually in software and labor costs

Duct Daddy

September 2024 – May 2025

Full Stack Software Engineer

Kansas City, MO (Remote)

- Led end-to-end development of a custom CMS and 15+ page marketing website using Next.js, Tailwind CSS, Node.js, Express, and MongoDB
- Created a scalable CMS architecture enabling dynamic content delivery and blog management for ongoing marketing efforts
- Integrated HouseCall Pro booking system, contributing to revenue growth from \$10K to \$40K within 6 months (300% increase)

Bay Valley Tech

March 2024 – September 2024

Frontend Software Engineer Intern

Modesto, CA

- Developed a responsive multi-page application using React, React Router, and Axios, ensuring seamless navigation across all pages and devices
- Built adaptive UI components including desktop sidebar navigation and mobile bottom navigation for consistent cross-device user experience
- Collaborated with backend engineers using Node.js, Express, and MongoDB to integrate RESTful APIs for authentication and data handling

PROJECTS

Lead Generation Tool

- Built a full-stack lead generation platform integrating Google Maps API to automate business discovery and identify leads with active websites
- Designed a responsive UI with filtering and real-time updates using Context API and React Hooks, improving lead efficiency by 70%
- Connected the frontend to a Node.js/Express backend for data validation and retrieval, reducing query latency by 45% and improving responsiveness
