SUMMARY

Full Stack Software Engineer experienced in building and shipping production SaaS platforms and operational business systems end-to-end. Developed scalable applications spanning scheduling, dispatching, CRM, invoicing, payments, and workflow automation. Comfortable owning the SDLC from system design and UX to backend architecture and deployment.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: Next.js, React, Redux, Tailwind CSS, Axios, Motion

Backend: Express, Node.js, Prisma ORM, PostgreSQL, MongoDB, MySQL

Tools: Git, GitHub Actions, Postman, Figma, Vercel, Heroku, Notion

EXPERIENCE

Liftmark

June 2025 – Present

Full Stack Software Engineer Freelancing

Modesto, CA

- Engineered a multi-tenant field service management platform supporting scheduling, dispatching, CRM, invoicing, payments, and automated customer workflows
- Designed scalable backend systems using Express, PostgreSQL, and Prisma ORM to support role-based workflows, operational event tracking, and audit logging
- Consolidated multiple third-party operational tools into a unified platform reducing software and administrative costs by approximately \$5K annually

Duct Daddy

September 2024 – May 2025

Full Stack Software Engineer Contract

Remote

- Developed a custom CMS and service booking platform using Next.js, Express, MongoDB, and Node.js for a growing home services business
- Architected scalable content management workflows enabling dynamic marketing pages, blog publishing, and operational updates without developer involvement
- Implemented lead capture and service request workflows contributing to a 300% increase in revenue within 6 months of deployment

Bay Valley Tech

March 2024 – September 2024

Software Engineer Intern

Modesto, CA

- Collaborated on a full-stack social media platform using React, Express, MongoDB, and Node.js within an Agile development environment
- Developed reusable responsive UI components and multi-device navigation systems improving usability across desktop and mobile platforms
- Integrated modern frontend application with RESTful APIs using Axios for authentication, routing, and dynamic data rendering

PROJECTS

Lead Generation Tool

- Built a lead generation platform integrating Google Maps APIs to automate local business discovery and prospect qualification workflows
- Developed responsive search and filtering interfaces using React Hooks and Context API for real-time lead exploration and management
- Iterated Node.js and Express backend services improving lead sourcing efficiency by approximately 70% through workflow automation
